Summary

Software Developer with hands-on experience in HTML, CSS, Java(oops), JavaScript, MongoDB, Express Js, React Js, Node Js. Skilled in clean coding, debugging, testing, and collaborating on real-world projects. Quick learner with strong problem-solving skills and an eagerness to grow into a full-time developer role.

Certifications

Full Stack Development – Entri Elevate **December 2025**
Comprehensive training in MERN stack, API development, debugging, deployment, and full-stack project development.
Data Analytics Virtual Internship – Accenture **March 2024 to April 2025**
Worked on data cleaning, modeling approaches, and business insights simulation tasks.
Generative AI – Google, LinkedIn **April 2025**
Learnt LLM fundamentals, prompt engineering, and AI-assisted development workflows.
Software Engineering Virtual Experience – JP Morgan Chase **April 2025**
Implemented interface fixes, handled API data feeds, and worked with financial data simulation tasks.
Learn Manual Software Testing+ Agile with jira Tool – Udemy **November 2023**
Covered SDLC/STLC fundamentals, Agile workflows, test design, defect tracking, and Jira usage.

Projects

Movie Review App (MERN) **Live Link** — **GitHub** **2025**
• Built MERN application with authentication, reviews, ratings and dashboards.
• Implemented protected routes, search filtering and optimized API responses.
Automation Testing Project (Java + Selenium) **Live Link** — **GitHub** **2024**
• Created Selenium scripts for functional and regression testing.
• Reported defects, verified fixes and improved test coverage.
Automated Rental Car System (Django + SQL) **Live Link** — **GitHub** **2023**
• Developed booking workflows, authentication and database models.
• Designed UI for searching and managing car reservations.
Online Outpass Generator (Java + SQL) **Live Link** — **GitHub** **2022**
• Built request submission, approval and tracking workflows.
• Added secure login and automated parent email notification.

Skills

Languages: Java(oops), JavaScript
Frontend: HTML, CSS, Bootstrap, Tailwind, React.js
Backend: Node.js, Express.js, Django, Java
Database: MySQL, MongoDB
Tools: Git, GitHub, Postman, VS Code, Selenium (Basics)
Core Strengths: Debugging, clean coding, problem solving, teamwork, learning attitude

Education

Full Stack Developer Program (MERN), Entri Elevate **2025–Present**
B.E. Computer Science and Engineering, Karpagam Institute of Technology **2019–2023**

Experience

Programmer Analyst Trainee — Cognizant **Dec 2023 – Apr 2024**
• Assisted in developing, testing, and maintaining Java-based systems.
• Participated in SDLC tasks, debugging, and feature enhancements.
• Prepared documentation and supported workflow improvements.
Intern — Cognizant **Oct 2023 – Dec 2023**
• Built UI components using HTML, CSS, and JavaScript.
• Executed test cases, logged bugs, and supported development teams.
